

Todd County School District Policy: EFC
--

FREE AND REDUCED PRICE FOOD SERVICES

The district will take part as feasible in the National School Lunch Program and other food programs that may become available for all children in the district to receive proper nourishment.

The Todd County School District will provide free and reduced price lunches, breakfasts, and milk to qualifying students. The district will do the surveys required by the state to determine into which categories the students would fall under normal income guidelines for participation in the program.

All financial records of these programs will be kept in a separate account by the business manager.
