

Todd County School District Policy: JCA

ASSIGNMENT OF STUDENTS TO SCHOOLS

The district encourages students to enroll in the school within the boundaries of where they are residing.

If a parent wishes for their student(s) to enroll and maintain enrollment in a school outside the District assigned boundaries, the following criteria must be met:

The school the parent is requesting to transfer to must have the capacity to accommodate the transfer request. The Building Principal of the receiving school makes the determination of capacity based on class size and the individual needs of the students currently enrolled and living within the boundaries of the school. The Building Principal will also contact the transportation department to determine if there is available busing for the student requesting the transfer.

Applications are time stamped and will be considered in the order they are received **after** the previous qualifications have been met.
